

Presentation Requirements New Technologies Web Quest

Your team's presentation is a very important part of this project. You will use the presentation to teach others about the technology explored and to generate discussion about the technology and future technology development. Remember to be creative as you put the presentation together. You are trying to convince the Board of *Patriot Pioneers* that the members of your team are experts in their knowledge of the researched technology and want the ideas presented for future technologies to be seriously considered for development by the company.

Here are the Basic requirements:

- A minimum of 12 slides.

Included in the 12 slides:

- A Title Slide: the Name of the Technology, Your Team Name, the Names of your Team Members, and the Class Period
- At least 7 Informational Slides: Tell us what you wanted to learn, what you learned, and share the information you found
- At least 2 slides about the Future Technologies your team has considered for the *Patriot Pioneers* to develop
- A Conclusion Slide: Summarize the Presentation
- A Resource Slide: List and Hyperlink the places where you found the information.

Please Remember:

-  A POWER POINT IS TO BE A GUIDE FOR TEACHING and SHARING INFORMATION. (It is called a Power Point NOT a Power Paragraph!)
-  Keep the visual simple and to the point.
-  Be careful with Animations, Transition, and Sounds. They are fun to use, but can be overdone. Choose them carefully to enhance your presentation.
-  All members of your Team must contribute to the presentation
 - This includes the Power Point and Speaking to the class!
-  Refer to the Rubric for the presentation on the Evaluation tab of the Web Quest.
